Having telemetry (Easy Read)

	You are coming to hospital for telemetry. This is the same as an EEG but you will stay in hospital for a few days. An EEG records your brain waves.
	We will measure your head and will clean small areas with a cotton bud. This will not hurt.
	We will put some silver discs with stickers and paste where we have cleaned on your head. This will not hurt.
	We will join the stickers to the EEG machine with wires. This will not hurt.
	We will also make a video of you. This will show us if you move around in the room or bed.
	You will need to stay in your room while you are having the test. There is a toilet in the room you can use.
	You will have all your meals in the room too. You can choose what to eat from the menu.
	When it is bedtime you will go to sleep as usual. You will still be having the EEG test.
	The Play Worker will bring you lots of things to do. You can bring your favourites from home too.

The doctor will say when the test stops. We will take off the stickers and wipe your head again.

You may have to stay for a few more hours to make sure you are getting better.

Please ask us if you have any questions.
